just how big is "big"...

It's hard to grasp the size of the largest land animals in history—
the long-neck sauropods. By comparison, the tallest land animal today
is the giraffe, and the largest is the elephant. Even a "school bus"
or a "two-story house" fails to convey their immensity!

AVERAGE TWO-STORY HOUSE 20 FEET (PLUS ROOF)

AVERAGE SCHOOL BUS-40 FEET

LONGEST LAND ANIMAL NOW LIVING: RETICULATED PYTHON—33 FEET TALLEST LAND ANIMAL NOW LIVING:

LARGEST LAND ANIMAL NOW LIVING: ELEPHANT—13 TONS (ABOUT 13 FEET TALL)
