

SAME APES & HUMANS

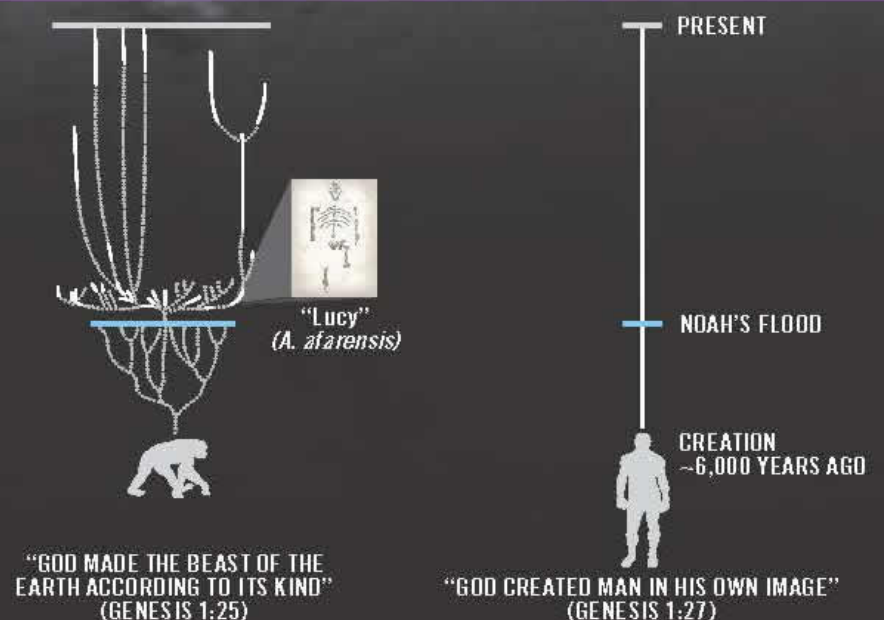

TWO DIFFERENT VIEWS

MAN'S WORD

MILLIONS OF YEARS AGO, apes first evolved from lower primates. Over time, new species appeared and then some went extinct—like "Lucy" (*A. afarensis*). The surviving species of this family tree include chimpanzees and humans.

GOD'S WORD

SIX THOUSAND YEARS AGO, God created many different "kinds" of land animals by His spoken word. On the same day, God made the first human, Adam, from the dust. The apes belong to one family tree, while humans belong to a separate family line (Acts 17:26).
