MAN'S WORD

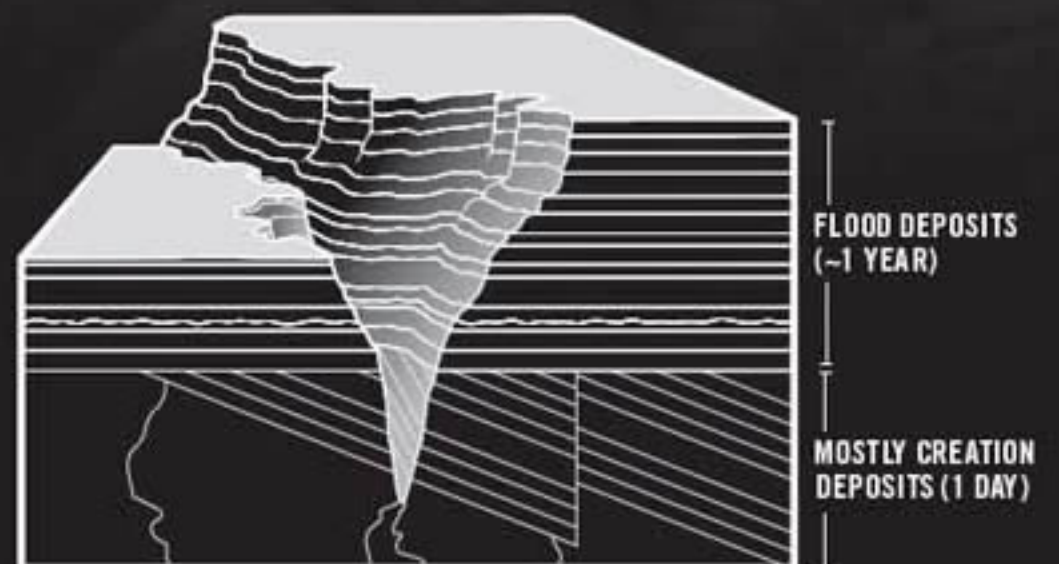

PRESENT, SLOW PROCESSES
formed Grand Canyon's layers

FOR BILLIONS OF YEARS, the same basic geologic processes have been building new rock layers. The earth's rock layers represent the results of this slow accumulation over time.

GOD'S WORD

PAST, RAPID PROCESSES
formed Grand Canyon's layers

DURING CREATION AND THE FLOOD, unique geologic processes deposited most of the earth's rock layers. On Day 3 of creation, dry land appeared above the seas (Genesis 1:9). Later, the one-time, year-long Flood deposited most of the earth's fossil-bearing layers.
