

# SAME DESIGN WITH AMAZING VARIETY

THE MOST DIVERSE ORDER OF ANIMALS ON THE PLANET IS BY FAR THE BEETLE—WITH OVER 350,000 SPECIES AND COUNTING. OUR ALL-WISE CREATOR SHOWED HOW HE CAN USE ONE BASIC BODY DESIGN TO CREATE A SPECTACULAR ARRAY OF FORMS. BEETLES HAVE FOUR WINGS LIKE MOST OTHER INSECTS. BUT THEIR FRONT TWO WINGS, CALLED ELYTRA, ARE ARMOR PLATES THAT PROTECT THE REAR FLIGHT WINGS, WHICH FOLD UNDERNEATH WHEN NOT IN USE.

**ONE BODY DESIGN, BUT EXTREME VARIETY:** 1. flower beetle (*Scarabaeidae*) 2. jewel scarab (*Scarabaeidae*) 3. leaf beetle (*Chrysomelidae*) 4. Hercules beetle (*Scarabaeidae*) 5. click beetle (*Elateridae*) 6. predaceous diving beetle (*Dytiscidae*) 7. Atlas beetle (*Scarabaeidae*) 8. jewel scarab (*Scarabaeidae*) 9. six-spot ground beetle (*Carabidae*) 10. jewel scarab (*Scarabaeidae*) 11. jewel scarab (*Scarabaeidae*) 12. flattened giant dung beetle (*Scarabaeidae*) 13. Japanese tiger beetle (*Carabidae*) 14. whirligig beetle (*Gyrinidae*) 15. longhorn beetle (*Cerambycidae*) 16. American longhorn beetle (*Cerambycidae*) 17. giant longhorn beetle (*Cerambycidae*) 18. ironclad beetle (*Zopheridae*) 19. American carrion beetle (*Silphidae*) 20. click beetle (*Elateridae*) 21. violin beetle (*Carabidae*)
