1. Psalm 19:1 says that “the heavens declare the glory of God.” What are some of God’s attributes, or characteristics, that you can learn by studying creation?

   

2. If we can learn about God by just looking around, how would you answer the common question, “Would God send to hell someone who has never heard about Jesus?” See Romans 1:20 for some ideas.

   

3. Give some examples of mathematical principles that reflect our observation of God’s creation. Hint: It might be easier to start with geometry.

   

4. What can we learn about God by studying the “story” of history (the facts as they are woven together into larger themes)? What does the way He guides the story tell us about Him? Hint: The Bible has a lot to say about the shortness and uncertainty of life, and the sudden destruction of the proud.

   

5. Can an unregenerate artist create beauty? Why or why not?

   

6. Identify your specific primary interest in life: major in school, career, or similar indicator. How can that be a vehicle for learning about God?

   

7. Based on the principles presented here, how should you change the way you think and act?
