“Can you draw out Leviathan with a hook, or snare his tongue with a line which you lower? Can you put a reed through his nose, or pierce his jaw with a hook?” (Job 41:1–2).

Tyrannosaurs, triceratops, stegosaurs, iguanodons, velociraptors . . . Dinosaurs are fascinating creatures, aren’t they? But how much of what we think we know about them is actually true?

Let’s rethink the answers to these questions, using the Bible (which tells us the true history of the universe) as the foundation for our thoughts, rather than just relying on what we’ve always heard or been taught.

God reveals to us through His Word that He spoke the whole of creation into existence in six actual days just a few thousand years ago. So did dinosaurs live on earth millions of years ago if the earth is only thousands of years old? No. They must have come into existence sometime during those first six days.

Did dinosaurs ever live with people?

Yes! God also fashioned the first man, Adam, on that sixth day. Adam was actually the first human to discover dinosaurs! This also means that dinosaurs didn’t turn into birds. Birds were formed the day before dinosaurs!

What did dinosaurs eat originally?

Genesis 1 teaches that at the end of the sixth day, God declared His completed creation “very good.” He instructed Adam, Eve, and all the animals to eat from the plants and trees. So, all dinosaurs (including the mighty T. rex!) munched on fruits and veggies in the very beginning.
Where did they go?

What really happened to the dinosaurs? It’s a question with multiple answers. See if you can find these words in the puzzle.

Formed  Found  Dinosaur
Fearless  Fiction  Meteor
Fallen  Behemoth  Fossils
Flood  Leviathan  Extinct
Faded  Dragon

What really happened to the dinosaurs?

It’s a question with multiple answers. See if you can find these words in the puzzle.

LET THERE BE FUN!

Where should you go first to find out the truth about dinosaurs?
