

# BRAIN Games

Read this issue and then use the clues below to complete the crossword puzzle. Can you do it?

## Across

- Sometimes it's easy to forget that our sun is actually a \_\_\_\_\_.
- Other stars can brighten and dim a lot. Wild swings like that with our sun would make life on earth \_\_\_\_\_.
- The moon has an odd \_\_\_\_\_ around the earth.
- God created the sun and moon on day \_\_\_\_\_ of creation week.
- The sun is the ideal \_\_\_\_\_ from earth. Not too close or we'd burn, and not too far away or we'd freeze.

## Down

- A \_\_\_\_\_ happens when the moon passes in front of the sun.
- While our sun does shoot out \_\_\_\_\_, they're tame in comparison to other stars.
- One thing is very different about our moon: how \_\_\_\_\_ God designed it to be compared to the earth.
- About every two years, the \_\_\_\_\_ passes in front of the sun, hiding it from view somewhere on earth.
