

BRAIN GAME ...

STEP 1: Unscramble these animal names and write them in the blanks.

HAMNOELCE _____ ¹○

ADOYNLRFG _____ ²○

OSALLOSC UQSID _____ ³○ _____ ⁴○

LABD ALEGE _____ ⁵○

TANSMI SMPIRH _____ ⁶○

STEP 2: Fill in the blank below with the letters that are in the circles above to find the name of another small animal with amazing eyes ... and long fingers. (The first letter has been filled in for you.)

T _____
 1 2 3 4 5 6

While this animal is weird looking, its eyes are pretty cool! Each eyeball is as large as the animal's entire brain. These huge peepers help it see well at night. Since its eyes are so large, it can't rotate them. Its neck does all the work and rotates all the way in both directions.
