Kids Answers Noah's Ark Bookmark!

Reading is so much fun! Here's a special bookmark from *Kids Answers* to mark your place as you read your Bible or another great book.

You will need:

Paper or Cardstock

Printer

Scissors

Glue

Contact paper

Ribbon or String

Instructions:

1. Print this page in color on paper or cardstock.
2. Cut the bookmark out along the outside dotted lines and fold it in half along the center line.
3. Glue the two sides together so it stays folded.
4. Put a piece of cardboard in the center of the paper before gluing it for a sturdier bookmark.
5. Cover with clear contact paper or have it laminated at an office supply store so it lasts longer.
6. Poke a hole in the top of the bookmark and tie a ribbon, string, etc. through as a tassel.

Steps 4, 5, and 6 are optional.

Trim on dashed lines, and fold on solid line in center

Just how big was the Ark?
The Bible tells us that it was 300 cubits long, 50 cubits wide, and 30 cubits high (Genesis 6:15). That's almost 12 school buses long, almost 4 buses high, and 10 buses wide!

510 feet

51 feet

Fun Facts About the Ark

When did God flood the world?
God judged the world with the Flood, saving Noah and his family, about 4,300 years ago. (from 2349 to 2348 BC)

They were in for a very long trip.
Noah and his family were on the Ark for over a year.

The Ark was HUGE and seaworthy.
There was plenty of room on the Ark for all the animals that God brought to Noah before the Flood. And there was still enough room for all the food they would need (Genesis 6:21).

What did all those animals eat?
They possibly ate hay, dried plants, seeds, grains, and maybe even dried meat.

Weren't dinosaurs too big for the Ark?
Not at all. The average size of a dinosaur is about the size of a sheep. God probably sent young, small dinosaurs, NOT old, big ones.

Where did all the floodwaters go?
They're still here! At the end of the Flood, the valleys sank down and the mountains rose up. The floodwaters ran off the land and into the oceans.

Vol. 2, No. 2
