Cypher Wheel

Photocopy this page, and then cut out the two circles. Punch a hole through the center in the middle of the circle, then insert a brad to hold the two together, the smaller one in front. If A=D, then place the smaller circle so that the D lines up under the bigger circle's A, then decode the letters one by one!

- If you set your Cypher Wheel so that A=G, then "Africa" would look like this: Glxoig

- If you set your Cypher Wheel so that A=P, then "barons" would look like this: qpgdch

- How would "truce" look if A=Y?

- Or if A=D?

- If P=M, which vocabulary word would look like this: phufkdqw?

Try writing some more vocabulary words in your own Cypher Wheel Code! See if your parents or brothers and sisters can decode them.

Africa	barons	breach	cave	commerce
explore	fair	guild	Gutenberg	Hundred Years War
long bow	merchant	navigator	plague	printing
revenue	town	trade	truce	John Wycliffe
