Create-a-craft

Stained Glass Window

You will need: black crayon; other colors of crayon; cotton ball; vegetable oil

You will need to make a photocopy of the following picture in order to create the stained glass window. Use the black crayon to outline this picture. Then, color in each separate portion with pretty crayon colors (bright colors work best). When you are finished, dip a cotton ball into a small amount of vegetable oil and brush lightly over the picture. Let it dry, then hang it up in a sunny window. Beautiful! You could also make your own picture.
