Introduction

What Does Biblical Authority Have to Do with Today's Church and Culture?

Ken Ham

Change the Culture?

What is your real motivation at AiG? Are you political activists? Are you trying to get creation taught in the public school classroom? Does your ministry aim to change the culture? Isn't the Church irrelevant in today's world?

These are just a few of the many questions I have been asked by the secular media over the years, particularly during the media blitz surrounding the opening of the Creation Museum in 2007. In these interviews, I made it clear that the thrust of Answers in Genesis (AiG) is to uphold the authority of God's Word as we not only provide answers to the questions of skeptics but also preach the gospel of Jesus Christ and see people won to the Lord.

At AiG, we understand that the Christian culture we once had in America (and the once-Christianized culture of the West in general) has become increasingly secularized over the past few years. AiG helps the Church understand that this societal change occurred from the foundation up — that is, instead of the culture generally being founded on the teachings in God's Word, generations were eventually taught to exalt

8 • How Do We Know the Bible Is True?

autonomous human reason instead and build their worldview on that foundation.

And what has been the basic and most successful mechanism for this secularization of the culture? Over the decades, millions upon millions of Americans, one person at a time, have been indoctrinated to believe in the idea of evolutionary naturalism and millions (billions!) of years and thus to doubt and ultimately disbelieve the Bible as true history.

As generations began to reject God's Word as reliable and authoritative, they began to consistently build a secular worldview based on moral relativism. As this change occurred, many such secular humanists moved into positions in education, the government, legal systems, etc. The worldview they had adopted determined how they would vote in passing laws, establishing curricula, making moral choices, and so on. The Western culture changed from a predominantly Christian worldview to an increasingly secular worldview. To understand how important a person's worldview truly is, consider what the Bible teaches about how a person's actions are governed by their thoughts.

For as he thinks in his heart, so is he (Proverbs 23:7).

For out of the abundance of the heart the mouth speaks
(Matthew 12:34).

As people repent, are converted to Christ, and are then taught to build their thinking consistently on God's Word (and as Christians are challenged to de-secularize their own thinking and build a proper worldview), then they can make an impact on the culture. After all, God's people are told to be "salt" and "light" (Matthew 5:13–14) — and thus affect the world for good. Jesus said, "Let your light so shine before men, that they may see your good works and glorify your Father in heaven" (Matthew 5:16). That's why I often explain to the secular media that the ministry of AiG and the Creation Museum is to preach the gospel and hope to see people converted to Christ and thus be "salt" and "light" in their daily living. As these people find themselves on school boards, are elected to local government, or obtain influential positions in the media, their worldview will govern the way they vote and effect changes.

The AiG ministry is providing answers to the skeptical questions of our day that cause people to doubt the Bible's historicity and truthfulness.

And in this era of history, the most attacked part of the Bible's history is Genesis 1–11. When people understand they can trust the history in the early chapters of Genesis, they can better understand and be more responsive to the gospel — the gospel that is based on that history. Of course, countering the skeptics brings up other apologetics questions that need to be answered.

AiG's aim is not to change the culture. Changing the culture is a by-product of a much bigger and more eternally significant goal. As one life at a time is changed, each of those Christians can have an impact on the culture for the glory of Christ.

So this is what AiG and the Creation Museum are “about” — and what we believe every Christian should be doing: presenting and defending the life-changing gospel message to see lives changed for the glory of God and to see the Church return to the rock-solid foundation on which it was built (Matthew 16:18; Ephesians 2:20).

Is the Church a Relic?

The Grand Canyon is a form of relic. What do I mean? Well, the present processes operating at the Grand Canyon in northern Arizona, such as the minimal erosion by the Colorado River, cannot explain how the canyon was really carved. In addition, no processes operating today at the canyon can explain the laying down of the massive sedimentary strata that I have seen there (e.g., Coconino Sandstone), nor the massive sheet erosion that resulted in the Kaibab Plateau.

In order to produce this “relic” of a deep canyon and layers we see today, something very different than what is happening in the present occurred in the past. It was the result of the aftereffects of the global Flood of Noah’s time.

To me, this is analogous to something happening with the Christian Church in our Western world. For example, I have traveled to the United Kingdom many times over the past 25 years. Several years ago, I began taking photos of British churches that have been turned into bars, nightclubs, Sikh temples, theaters, shopping centers — the list is a long one.

The U.K. was once predominantly Christian. Today, most of the U.K. has become extremely pagan; just a remnant of Christianity remains in England and the other U.K. nations. Even though there are some new

10 • How Do We Know the Bible Is True?

churches (thank God!), “relic” churches exist all across the U.K. The Christian influence is largely gone.

You see, just like the Grand Canyon, something was different in the past. The current state of England and the rest of the U.K. does not explain why there were so many churches in the past and why they had considerable Christian influence on society.

I want to suggest to you that where the U.K. is today, America will be “tomorrow” — and for the same reasons if we continue on this trend. The Church could very well become a “relic” in America if God’s people don’t deal with the foundational nature of the problem that has produced the sad situation in the U.K. today. Imagine how this must grieve the heart of God!

Here is one thing that particularly alarms me: research by George Barna has shown that of those students from Christian homes in America who go to public schools (about 95 percent of all students), at least 70 percent of them will walk away from the Church and the faith of their parents once they leave home.¹

A fairly recent report states: “A new study by The Barna Group conducted among 16- to 29-year-olds shows that a new generation is more skeptical of and resistant to Christianity than were people of the same age just a decade ago.”²

These statistics were confirmed in *Already Gone*, the book I co-authored with Britt Beemer from America’s Research Group. In fact, our research revealed that many of these young people who walk away from the Church once they leave home have actually “checked out” long before leaving home. These young people have serious doubts about biblical authority, particularly in the first 11 chapters of Genesis.

AiG has been continually bringing to the Church’s attention a major challenge of the day: our culture is filled with increasing numbers of people who do not believe the Bible is a credible book. As a result, the culture has lost faith in biblical authority.

-
1. Barna Research Online, “Teenagers Embrace Religion but Are Not Excited About Christianity,” January 10, 2000: www.barna.org/...teensnext.../147-most-twenty-somethings-put-christianity-on-the-shelf-following-spiritually-active-teen-years.
 2. Barna Research Online, “A New Generation Expresses Its Skepticism and Frustration with Christianity,” September 24, 2007: <http://www.barna.org/barna-update/article/16-teensnext-gen/94-a-new-generation-expresses-its-skepticism-and-frustration-with-christianity>.

And why has this happened? It did not occur overnight. Generation after generation, there has been a slow erosion of biblical authority in America. In fact, ever since the early 19th century the idea of a millions- or billions-of-years-old age for the earth/universe was beginning to become popular in the U.K. and the United States. Much of the Church quickly adopted the old-age view. And they reinterpreted the days of creation and Noah's Flood in Genesis.

Soon, much of the Church also adopted many of Darwin's blatant evolutionary beliefs (and just added God to this). Generation after generation, the Church has reinterpreted God's Word in Genesis in response to secular ideas. Each subsequent generation has become more firm in the belief that if the first part of the Bible (which is the foundational history for all Christian doctrine, including the gospel) is not true, how can the rest be? Biblical authority is undermined, the Bible's credibility is destroyed, and the Christian influence in the culture is eroded.

AiG has been raised up by God for this era of history to help challenge the Church concerning biblical authority, which could (as God blesses)

ultimately change the culture. Remember: “If the foundations are destroyed, what can the righteous do?” (Psalm 11:3).

Calling for Reformation

Here is an example of how the foundation has shifted for one particular group. In 1977, the Assemblies of God denomination adopted a “Doctrine of Creation” report, which stated the following:

This Bible record of creation thus rules out the evolutionary philosophy which states that all forms of life have come into being by gradual, progressive evolution carried on by resident forces. It also rules out any evolutionary origin for the human race, since no theory of evolution, including theistic evolution, can explain the origin of the male before the female, nor can it explain how a man could evolve into a woman. . . .

The account of creation is intended to be taken as factual and historical. Our understanding of God as Creator is rooted in a revelation that is historical in nature, just as our understanding of God as Redeemer is rooted in the revelation of God’s dealings with Israel in history and in the historical events of the life, death, and resurrection of His Son.³

But fast forward to 2010 and see what has changed. A new “Doctrine of Creation” was adopted by the “General Presbytery,” the governing body of the Assembly of God churches. Here is the denomination’s official view today:

The advance of scientific research, particularly in the last few centuries, has raised many questions about the interpretation of the Genesis accounts of creation. In attempting to reconcile the Bible and the theories and conclusions of contemporary scientists, it should be remembered that the creation accounts do not give precise details as to how God went about His creative activity. Nor do these accounts provide us with complete chronologies that enable us to date with precision the time of the various stages of creation. Similarly, the findings of science are constantly

³ “The Doctrine of Creation,” copyrighted by the General Council of the Assemblies of God; adopted by the Assemblies of God General Presbytery, August 15–17, 1977.

expanding; the accepted theories of one generation are often revised in the next.

As a result, equally devout Christian believers have formed very different opinions about the age of the earth, the age of humankind, and the ways in which God went about the creative processes. Given the limited information available in Scripture, it does not seem wise to be overly dogmatic about any particular creation theory. . . . We urge all sincere and conscientious believers to adhere to what the Bible plainly teaches and to avoid divisiveness over debatable theories of creation.⁴

My heart was heavy as I read the statement “the findings of science are constantly expanding; the accepted theories of one generation are often revised in the next.” Well, at least the Bible hasn’t changed in the past 33 years. But man’s ideas certainly have!

The message here from this denomination is essentially this: because of “the theories and conclusions of contemporary scientists” regarding origins, Christians must change their interpretation of the Bible in Genesis! This low view of Scripture and esteeming man’s ideas is a major problem within many denominations. In fact, the tragedy of reinterpreting God’s clear words to fit in man’s beliefs has always existed with God’s people. The same problem is recorded in Genesis when the serpent tempted Eve by asking, “Did God really say . . . ?” (Genesis 3:1; NIV).

Creating doubt regarding God’s Word has greatly undermined biblical authority in society as a whole, even its churches.

We live in an era of great scientific advancement. But remember: *science* means “knowledge.” There is a big difference between knowledge gained by observation that builds our technology in the present (“operational science”) and knowledge concerning the past (“historical science”), which cannot be observed directly. “Historical science” is being used as the authority over God’s Word.

The Assembly of God denomination is insisting that fallible man’s historical science (beliefs about the past concerning origins) must be used to reinterpret God’s clear and infallible Word. (By the way, I thank God

⁴ “The Doctrine of Creation,” copyrighted by the General Council of the Assemblies of God; adopted by the Assemblies of God General Presbytery, August 9–11, 2010.

14 • How Do We Know the Bible Is True?

for the many pastors in these churches who stand on the Word of God and cringe at their denomination's new position.)

AiG's mission statement declares that we are to be "a catalyst to bring reformation by reclaiming the foundations of our faith which are found in the Bible, from the very first verse."

What can the righteous do as the foundations of Christianity are being destroyed? We need a new reformation in our churches. Christians need to be figuratively nailing Genesis chapters 1–11 on the doors of churches and Christian colleges/seminaries, challenging God's people to return to the authority of the Bible.

We will continue to see a decline in our nation, churches, and families — unless God's people repent of compromise and return to His Word! We need to understand that the Bible is true and it is the authority when it comes to creation apologetics as well as general apologetics. This book is designed to show you how to answer many of the skeptical questions of our day while firmly standing upon the Word of God. It is time for a new reformation, a time to return to the 66 books of the Bible as the absolute standard in all areas.

Chapter 1

How Do We Know the Bible Is True?

Jason Lisle

The Bible is an extraordinary work of literature, and it makes some astonishing claims. It records the details of the creation of the universe, the origin of life, the moral law of God, the history of man's rebellion against God, and the historical details of God's work of redemption for all who trust in His Son. Moreover, the Bible claims to be God's revelation to mankind. If true, this has implications for all aspects of life: how we should live, why we exist, what happens when we die, and what our meaning and purpose is. But how do we know if the claims of the Bible are *true*?

Some Typical Answers

A number of Christians have tried to answer this question. Unfortunately, not all of those answers have been as cogent as we might hope. Some answers make very little sense at all. Others have some merit but fall short of proving the truth of the Bible with certainty. Let's consider some of the arguments that have been put forth by Christians.

A Subjective Standard

Some Christians have argued for the truth of the Scriptures by pointing to the changes in their own lives that belief in the God who inspired

the Bible has induced. Receiving Jesus as Lord is a life-changing experience that brings great joy. A believer is a “new creation” (2 Corinthians 5:17). However, this change does not in and of itself prove the Bible is true. People might experience positive feelings and changes by believing in a position that happens to be false.

At best, a changed life shows consistency with the Scriptures. We would expect a difference in attitudes and actions given that the Bible is true. Although giving a testimony is certainly acceptable, a changed life does not (by itself) demonstrate the truth of the Scriptures. Even an atheist might argue that his belief in atheism produces feelings of inner peace or satisfaction. This does not mean that his position is *true*.

By Faith

When asked how they know that the Bible is true, some Christians have answered, “We know the Bible is true *by faith*.” While that answer may sound pious, it is not very logical, nor is it a correct application of Scripture. Faith is the confident belief in something that you cannot perceive with your senses (Hebrews 11:1). So when I believe without observation that the earth’s core is molten, I am acting on a type of faith. Likewise, when I believe in God whom I cannot directly see, I am acting on faith. Don’t misunderstand. We should indeed have faith in God and His Word. But the “*by faith*” response does not actually answer the objection that has been posed — namely, *how we know* that the Bible is true.

Since faith is a belief in something unseen, the above response is not a good argument. “We know by faith” is the equivalent of saying, “We know by believing.” But clearly, the act of believing in something doesn’t necessarily make it true. A person doesn’t really know something just by believing it. He simply believes it. So the response is essentially, “We believe because we believe.” While it is true that we believe, this answer is totally irrelevant to the question being asked. It is a non-answer. Such a response is not acceptable for a person who is a follower of Christ. The Bible teaches that we are to be ready to give an *answer* to anyone who asks a reason of the hope that is within us (1 Peter 3:15). Saying that we have faith is not the same as giving a *reason* for that faith.

Begging the Question

Some have cited 2 Timothy 3:16 as proof that the Bible is the inerrant Word of God. This text indicates that all Scripture is inspired by God (or “God-breathed”) and useful for teaching. That is, every writing in the Bible is a revelation from God that can be trusted as factually true. Clearly, if the Bible is given by revelation of the God of truth, then it can be trusted at every point as an accurate depiction. The problem with answering the question this way is that it presupposes that the verse itself is truthful — which is the very claim at issue.

In other words, how do we know that 2 Timothy 3:16 is true? “Well it’s in the Bible,” some might say. But how do we know the Bible is true? “Because 2 Timothy 3:16 assures us that it is.” This is a vicious circular argument. It must first arbitrarily assume the very thing it is trying to prove. Circular reasoning of this type (while technically valid) is not useful in a debate because it does not prove anything beyond what it merely assumes. After all, this type of argument would be equally valid for any other book that claims to be inspired by God. How do we know that book X is inspired by God? “Because it says it is.” But how do we know that what it’s saying is true? “Well, God wouldn’t lie!”

On the other hand, some Christians might go too far the other way — thinking that what the Bible says about itself is utterly irrelevant to the question of its truthfulness or its inspiration from God. This, too, is a mistake. After all, how would we know that a book is inspired by God unless it claimed to be? Think about it: how do you know who wrote a particular book? The book itself usually states who the author is. Most people are willing to accept what a book says about itself unless they have good evidence to the contrary.

So it is quite relevant that the Bible itself claims to be inspired by God. It does claim that all of its assertions are true and useful for teaching. Such statements do prove *at least* that the writers of the Bible considered it to be not merely their own opinion, but in fact the inerrant Word of God. However, arguing that the Bible must be true *solely* on the basis that it says so is not a powerful argument. Yes, it is a relevant claim. But we need some additional information if we are to escape a vicious circle.

Textual Consistency and Uniqueness

Another argument for the truthfulness of the Bible concerns its uniqueness and internal consistency. The Bible is remarkably self-consistent, despite having been written by more than 40 different writers over a time span of about 2,000 years. God's moral law, man's rebellion against God's law, and God's plan of salvation are the continuing themes throughout the pages of Scripture. This internal consistency is what we would expect if the Bible really is what it claims to be — God's revelation.

Moreover, the Bible is uniquely authentic among ancient literary works in terms of the number of ancient manuscripts found and the smallness of the time scale between when the work was first written and the oldest extant manuscript (thereby minimizing any possibility of alteration from the original).¹ This indicates that the Bible has been accurately transmitted throughout the ages, far more so than other ancient documents. Few people would doubt that Plato really wrote the works ascribed to him, and yet the Bible is *far* more authenticated. Such textual criticism shows at least that the Bible (1) is unique in ancient literature and (2) has been accurately transmitted throughout the ages. What we have today is a good representation of the original. No one could consistently argue that the Bible's authenticity is in doubt unless he is willing to doubt all other works of antiquity (because they are far less substantiated).²

To be sure, this is what we would expect, given the premise that the Bible is true. And yet, uniqueness and authenticity to the original do not necessarily prove that the source is *true*. They simply mean that the Bible is unique and has been accurately transmitted. This is consistent with the claim that the Bible is the Word of God, but it does not decisively prove the claim.

External Evidence

Some Christians have argued for the truth of Scripture on the basis of various lines of external evidence. For example, archaeological discoveries have confirmed many events of the Bible. The excavation of Jericho reveals that the walls of this city did indeed fall as described in the Book

1. See chapters 5 and 12 of Brian Edwards, *Nothing but the Truth* (Darlington, UK: Evangelical Press, 2006).

2. Josh McDowell and Bill Wilson, *A Ready Defense* (Nashville, TN: Thomas Nelson Publishers, 1993), p. 42–55.

of Joshua.³ Indeed, some passages of the Bible, which critics once claimed were merely myth, have now been confirmed archeologically. For example, the five cities of the plain described in Genesis 14:2 were once thought by secular scholars to be mythical, but ancient documents have been found that list these cities as part of ancient trade routes.⁴

Archaeology certainly confirms Scripture. Yet it does not prove that the Bible is *entirely* true. After all, not every claim in Scripture has been confirmed archeologically. The Garden of Eden has never been found, nor has the Tower of Babel or Noah's ark (as of this writing). So at best, archaeology demonstrates that *some* of the Bible is true.

Such consistency is to be expected. Yet, using archaeology in an attempt to *prove* the Bible seems inappropriate. After all, archaeology is an uncertain science; its findings are inevitably subject to the interpretation and bias of the observer and are sometimes overturned by newer evidence. Archaeology is useful, but fallible. Is it appropriate to use a *fallible* procedure to judge what claims to be the *infallible* Word of God? Using the less certain to judge the more certain seems logically flawed. Yes, archaeology can show consistency with Scripture but is not in a position to *prove* the Bible in any decisive way because archaeology itself is not decisive.

Predictive Prophecy and Divine Insight

A number of passages in the Bible predict future events in great detail — events that were future to the writers but are now in our past. For example, in Daniel 2 a prophecy predicted the next three world empires (up to and including the Roman Empire) and their falls. If the Bible were not inspired by God, how could its mere human writers possibly have known about events in the distant future?⁵

-
3. Bryant Wood, "The Walls of Jericho," *Creation* 21 (2) March–May 1999, p. 36–40, <http://www.answersingenesis.org/creation/v21/i2/jericho.asp#>.
 4. Bryant Wood, "The Discovery of the Sin Cities of Sodom and Gomorrah," *Bible and Spade* (Summer 1999), <http://www.biblearchaeology.org/post/2008/04/16/The-Discovery-of-the-Sin-Cities-of-Sodom-and-Gomorrah.aspx>.
 5. Even this begs the question to some degree. A critic could (hypothetically) argue that some people have the ability to perceive distant future events through some as-yet undiscovered mechanism (be it psychic powers or whatever). The Christian knows better; he knows that God *alone* declares the end from the beginning (Isaiah 46:9–10). But the Christian knows this because it is what the Bible says. So only by presupposing the truth of the Bible could we cogently argue that *only God* can know the future.

20 • How Do We Know the Bible Is True?

The Bible also touches on matters of science in ways that seem to go beyond what was known to humankind at the time. In Isaiah 40:22 we read about the spreading out (expansion) of the heavens (the universe). Yet secular scientists did not discover such expansion until the 1920s. The spherical nature of the earth and the fact that the earth hangs in space are suggested in Scriptures such as Job 26:10 and Job 26:7 respectively. The Book of Job is thought to have been written around 2000 B.C. — long before the nature of our planet was generally known.

Such evidence is certainly consistent with the claim that the Bible is inspired by God. And some people find such evidence convincing. Yet, persons who tenaciously resist the idea that the Bible is the Word of God have offered their counterarguments to the above examples. They have suggested that the predictive prophetic passages were written after the fact, much later than the text itself would indicate. Examples of apparent scientific insight in the Bible are chalked up to coincidence.

Moreover, there is something inappropriate about using secular science to judge the claims of the Bible. As with archeological claims, what constitutes a scientific fact is often subject to the bias of the interpreter. Some people would claim that particles-to-people evolution is a scientific fact. Although creationists would disagree, we must concede that what some people *think* is good science does not always coincide with the Bible.

The Bible does show agreement with some of what is commonly accepted as scientific fact. But what is considered scientific fact today might not be tomorrow. We are once again in the embarrassing position of attempting to judge what claims to be infallible revelation from God by the questionable standards of men. Again, how can we judge what claims to be *inerrant* revelation by a standard that is itself uncertain and ever-changing? This would be like using something we merely suspect to be about three feet long to check whether a yardstick is accurate. Using the less certain to judge the more certain just doesn't make sense. At best, such things merely show consistency.

The Standard of Standards

The above lines of evidence are certainly consistent with the premise that the Bible is true. Many people have no doubt found such evidence quite convincing. Yet we must admit that none of the above lines of evidence quite

proves that the Bible must be the inerrant Word of God. Critics have their counterarguments to all of the above. If we are to know *for certain* that the Bible is true, we will need a different kind of argument — one that is absolutely conclusive and irrefutable. In all the above cases, we took as an unstated premise that there are certain standards by which we judge how likely something is true. **When we stop to consider what these standards are, we will see that the *standards themselves* are proof that the Bible is true.**

Putting it another way, only the Bible can make sense of the standards by which we evaluate whether or not something is true. One such set of standards are the laws of logic. We all know that a true claim cannot contradict another true claim. That would violate a law of logic: the law of non-contradiction. The statements “The light is red” and “The light is not red” cannot both be true at the same time and in the same sense. Laws of logic thus represent a standard by which we can judge certain truth claims. Moreover, all people seem to “know” laws like the law of non-contradiction. We all assume that such laws are the same everywhere and apply at all times without exception. But why is this? How do we *know* such things?

If we consider the biblical worldview, we find that we can make sense of the laws of logic. The Bible tells us that God’s mind is the standard for all knowledge (Colossians 2:3). Since God upholds the entire universe and since He is beyond time, we would expect that laws of logic apply everywhere in the universe and at all times. There can never be an exception to a law of logic because God’s mind is sovereign over all truth. We can know laws of logic because we are made in God’s image and are thus able to think in a way that is consistent with His nature (Genesis 1:27). So when we take the Bible as our worldview, we find that laws of logic make sense.

But if we don’t accept the Bible as true, we are left without a foundation for laws of logic. How could we know (apart from God) that laws of logic work *everywhere*? After all, none of us has universal knowledge. We have not experienced the future nor have we traveled to distant regions of the universe. Yet we assume that laws of logic will work in the future as they have in the past and that they work in the distant cosmos as they work here. But how could we possibly know that apart from revelation from God?

Arguing that laws of logic have worked in our past experiences is pointless — because that’s not the question. The question is: how can we know that they will work in the future or in regions of space that we have

never visited? Only the Christian worldview can make sense of the universal, exception-less, unchanging nature of laws of logic. Apart from the truth revealed in the Bible, we would have no reason to assume that laws of logic apply everywhere at all times, yet we all do assume this. Only the Christian has a good reason to presume the continued reliability of logic. The non-Christian does not have such a reason in his own professed worldview, and so he is being irrational: believing something without a good reason. The unbeliever has only “blind faith” but the Christian’s faith in the Bible makes knowledge possible.

The Foundation of Science

Another standard we use when evaluating certain kinds of claims is the standard of science. The tools of science allow us to describe the predictable, consistent way in which the universe normally behaves. Science allows us to make successful predictions about certain future states. For example, if I mix chemical A with chemical B, I expect to get result C because it has always been that way in the past. This happens the same way every time: if the conditions are the same, I will get the same result. Science is based on an underlying uniformity in nature. But why should there be such uniformity in nature? And how do we know about it?

We all presume that the future will be like the past in terms of the basic operation of nature. This does not mean that Friday will be exactly like Monday — conditions change. But it does mean that things like gravity will work the same on Friday as they have on Monday. With great precision, astronomers are able to calculate years in advance the positions of planets, the timing of eclipses, and so on — only because the universe operates in such a consistent way. We all know that (in basic ways) the universe will behave in the future as it has in the past. Science would be impossible without this critical principle. But what is the foundation for this principle?

The Bible provides that foundation. According to the biblical worldview, God has chosen to uphold the universe in a consistent way for our benefit. He has promised us in places such as Genesis 8:22 that the basic cycles of nature will continue to be in the future as they have been in the past. Although specific circumstances change, the basic laws of nature (such as gravity) will continue to work in the future as they have in the past. Interestingly, only God is in a position to tell us on His own authority that

this will be true. According to the Bible, God is beyond time,⁶ and so only He knows what the future will be. But we are within time and have not experienced the future. The only way we could know the future will be (in certain ways) like the past is because God has told us in His Word that it will be.

Apart from the Bible, is there any way we could know that the future will be like the past? So far, no one has been able to show how such a belief would make sense apart from Scripture. The only nonbiblical explanations offered have turned out to be faulty. For example, consider the following.

Some people argue that they can know that the future will be like the past on the basis of past experience. That is, in the past when they assumed that the future would be like the past, they were right. They then argue that this past success is a good indicator of future success. However, in doing so they arbitrarily assume the very thing they are supposed to be proving: that the future will be like the past. They commit the logical fallacy of begging the question. Any time we use past experience as an indicator of what will probably happen in the future, we are relying on the belief that the future will be (in basic ways) like the past. So we cannot merely use past experience as our reason for belief that in the future nature will be uniform, unless we *already knew* by some other way that nature is uniform. If nature were not uniform, then past success would be *utterly irrelevant* to the future! Only the biblical worldview can provide an escape from this vicious logical circle. And that is another very good reason to believe the Bible is true.

We Already Know the God of the Bible

Since only the Bible can make sense of the standards of knowledge, it may seem perplexing at first that people who deny the Bible are able to have knowledge. We must admit that non-Christians are able to use laws of logic and the methods of science with great success — despite the fact that such procedures only make sense in light of what the Bible teaches. How are we to explain this inconsistency? How is it that people deny the truth of the Bible and yet simultaneously *rely* upon the truth of the Bible?

The Bible itself gives us the resolution to this paradox. In Romans 1:18–21 the Scriptures teach that God has revealed Himself to everyone.

6. E.g., 2 Peter 3:8; Isaiah 46:9–10.

God has “hardwired” knowledge of Himself into every human being, such that we all have inescapable knowledge of God. However, people have rebelled against God — they “suppress the truth in unrighteousness” (Romans 1:18). People go to great lengths to convince themselves and others that they do not know what, in fact, they must know. They are denying the existence of a God who is rightly angry at them for their rebellion against Him.

But since all men are made in God’s image, we are able to use the knowledge of logic and uniformity that He has placed within us,⁷ even if we inconsistently deny the God that makes such knowledge possible. So the fact that even unbelievers are able to use logic and science is a proof that the Bible really is true. When we understand the Bible, we find that what it teaches can make sense of those things necessary for science and reasoning. God has designed us so that when believers read His Word, we recognize it as the voice of our Creator (John 10:27). The truth of the Bible is inescapably certain, for if the Bible were not true, we couldn’t know anything at all. It turns out that the worldview delineated by the Bible is the only worldview that can make sense of all those things necessary for knowledge.

Conclusion

The truth of the Bible is obvious to anyone willing to fairly investigate it. The Bible is uniquely self-consistent and extraordinarily authentic. It has changed the lives of millions of people who have placed their faith in Christ. It has been confirmed countless times by archaeology and other sciences. It possesses divine insight into the nature of the universe and has made correct predictions about distant future events with perfect accuracy. When Christians read the Bible, they cannot help but recognize the voice of their Creator. The Bible claims to be the Word of God, and it demonstrates this claim by making knowledge possible. It is the standard of standards. The proof of the Bible is that unless its truth is presupposed, we couldn’t prove anything at all.⁸

-
7. Babies do not “learn” uniformity in nature. They are born already knowing it. When a baby burns his hand on a candle, he does not quickly do it again because he rightly believes that if he does it again it will hurt again. The baby already knows that the future reflects the past.
 8. This fact has been recognized and elaborated upon by Christian scholars such as Dr. Cornelius Van Til and Dr. Greg Bahnsen.
